PROFESSIONAL PROFILE

Quality Engineering leader with nearly 15 years of experience in payments, aviation, travel and enterprise platforms. Combines test architecture and automation expertise with cross-team technical leadership, continuous delivery and AI adoption. Leads portfolio-wide QE strategy at Emirates, translating engineering improvements into faster validation, safer deployments and measurable business outcomes.

PROFESSIONAL EXPERIENCE

Emirates Group IT | Lead Quality Assurance Engineer

Dubai, UAE · March 2023 - Present

Quality leadership for a channel-agnostic payments platform processing **AED 145 million daily**; technical leadership of a Systems Team of 3 Software Engineers and 2 Quality Engineers.

AI transformation & technical leadership

- Lead the QE Chapter's AI transformation strategy for approximately **90 engineers**, defining adoption practices, capability ownership and cross-team governance.
- Lead the team delivering **QualifAI**, an AI-driven QE governance framework spanning requirements and solution reviews, test planning, design, generation and execution.
- Established core maintainers, adoption SPOCs and agent/skill SMEs to support contribution standards and distributed ownership. QualifAI represented Enterprise IT at **ForsaTEK 2026**.

Continuous delivery & operational resilience

- Led delivery of one-click environment cloning and baselining, enabling **22 production promotions across 200+ services** in one year with **zero configuration-related production issues**.
- The solution enabled the application landscape's migration during the Bahrain data-centre outage in **under three days**.
- Drove DTA governance, environment standardisation and frequent deployment initiatives to improve release confidence and time to market.

Quality strategy & measurable improvement

- Launched a quality transformation within the first month, defining a maturity roadmap across product, delivery and engineering quality.
- Reduced post-development validation from **15 days to 1.5 days** through critical-user-journey automation.
- Built quality telemetry with **Python, PostgreSQL and Grafana**; introduced recurring Quality Summary Reports and embedded QE objectives in PI planning.

PROFESSIONAL EXPERIENCE · CONTINUED

Agoda | Lead Quality Assurance Engineer

Bangkok, Thailand · May 2021 - February 2023

- Owned quality strategy for booking and payments; acted as Quality Product Owner to prioritise delivery needs and long-term engineering improvements.
- Introduced contract testing, mutation testing and SQL unit tests; analysed production defects and CI metrics to identify quality gaps and delivery bottlenecks.
- Set quarterly improvement targets, presented quality outcomes to senior leadership and C-suite stakeholders, and standardised hiring assessments.

Emirates | Lead QA Engineer / Senior Technical Engineer

Dubai, UAE · January 2019 - March 2021 · Contract

- Led technical QA across five feature teams for an omnichannel microservices and micro-frontend platform; supported **10,000+ functional and non-functional tests** with over **95% automation**.
- Led Jenkins test integration, reusable test libraries, microservice test design, performance testing and AWS chaos engineering; coordinated standards across 100+ testers.

PwC India | Senior Consultant / Technology Consultant

Kolkata, India · January 2016 - January 2019

- Defined quality strategy for global data, risk and compliance platforms spanning **150+ territories**, partnering with product, data governance and platform teams.
- Led a **seven-member QA team** across five applications, covering automated acceptance criteria, backlog refinement and UAT coordination.

Infosys Limited | Test Analyst

Bhubaneswar, India · November 2011 - January 2016

- Built regression automation for web and mainframe applications supporting US Medicare and Medicaid; coordinated offshore testing with onsite and business teams.

TECHNICAL EXPERTISE

Quality: Test strategy, API and component testing, contract testing, mutation testing, performance testing, resilience testing, Playwright, WebdriverIO, Cypress

AI & delivery: Agentic QE workflows, AI governance, CI/CD, Jenkins, GitLab, Spinnaker, AWS, Kubernetes, microservices

Languages & data: Java, Python, JavaScript, Scala, PostgreSQL, Grafana, Power BI

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science & Engineering · RCC Institute of Information Technology · 2011

ISTQB Advanced Level / Technical Test Analyst · Microsoft Azure Fundamentals (2021)

Machine Learning, Stanford University / Coursera (2018)
